EDUCATION

Rochester Institute of Technology
PhD in Computing and Information Sciences
Current CGPA: 3.93 (out of 4.00)

August 2021 - Present

University of Dhaka
BSc in Computer Science and Engineering
Department of Computer Science and Engineering
CGPA: 3.55 (out of 4.00)

January 2016 - January 2020

RESEARCH EXPERIENCE

Bangla Abstractive Text Summarization using Encoder-Decoder Model *2019-2020*

A research project on constructing a dataset for the task of abstractive text summarization in Bangla, and constructing a deep learning based model capable of using said dataset. The model was written in Python using Tensorflow modules. The research was conducted as the final year research project at University of Dhaka under the supervision of Dr. Muhammad Asif Hossain Khan.

Code Search *2021-2024*

Research project focusing on retrieving programming language artifacts related to some natural language queries from a pool of possible programming language artifacts, using dual encoder models. Model is built in Python using TensorFlow modules. The research was conducted under the guidance of Dr. Zhe Yu. This work has recently been published in Empirical Software Engineering Journal.

Comparative judgment *2023-Present*

Research project focusing on modeling comparative judgments on story point estimation data from software development, using various architectures, including large language model based structures. The framework is built using PyTorch modules. The research is being conducted under the guidance of Dr. Zhe Yu.

WORK EXPERIENCE

Graduate Research Assistant

Fall 2021 - Fall 2023, Fall 2024

Have worked as a graduate research assistant in the Lab of Human-In-the-Loop Software Engineering at Rochester Institute of Technology under the guidance of Dr. Zhe Yu, conducting research primarily on the code search and comparative judgment tasks.

Graduate Teaching Assistant

Worked as a graduate teaching assistant for the following courses -

- **IDAI-720: Research Methods for Artificial Intelligence (Spring 2024)** at Rochester Institute of Technology. Responsibilities included grading assignments and hosting office hours. Course was taught by Dr. Zhe Yu and Dr. Esa Rantanen.
- **IDAI-710: Fundamentals of Machine Learning (Spring 2025)** at Rochester Institute of Technology. Responsibilities included grading homeworks, hosting office hours, and holding occasional lectures and review classes. Course was taught by Dr. James Heard.

Intern

June 2024 - August 2024

Worked as an intern at ABB AG at the Mannheim, Germany office. Work during the internship focused on a Named Entity Recognition project using various methods, including language models, large language models, deep learning models and more. The project was conducted under the supervision of Nika Strem. The internship was obtained through the DAAD Rise Professional Program 2024.

COURSE PROJECTS

Kabaddi

2016

A single or multiplayer video game based on the sport of the same name. Written in C++ as the Fundamentals of Programming Lab project at University of Dhaka.

<https://github.com/monoshizm khan/Kabaddi>

Trapped

2017

A single or online multiplayer interactive puzzle game. Written in JAVA as the Object Oriented Programming Lab project at University of Dhaka.

<https://github.com/monoshizm khan/Trapped>

Musyc

2018

A music-based social networking application with a built-in offline music player on Android platform. Made using JAVA and SQLite as the Application Development Lab project at University of Dhaka.

<https://github.com/monoshizm khan/Musyc>

EasyML

2018

A web-based application for the purpose of applying and visualizing several machine learning algorithms on datasets. Written using Python and JavaScript Served as the project in the course Software Engineering Lab at University of Dhaka.

<https://github.com/Saad-Mahmud/EasyML>

Pharmassistant

2018

A software as a user interface for the use of online product inventory, searching, sales and finances management by employees of a pharmacy. Written in Python and JavaScript as the Software Design Patterns Lab project at University of Dhaka.

<https://github.com/HHMoon13/Pharmassist>

CSEDU Project Hub

2019

A web application for the purpose of storing, sharing and viewing undergrad research projects. Written in Python and JavaScript as the Internet Programming Lab project at University of Dhaka.

<https://github.com/monoshizmkan/CSEDU-Project-Hub>

BackPack

2022

An e-store for selling hiking, camping and miscellaneous equipment and equipment collections (known on the store as backpacks). Written using Java Spring and Angular frameworks as the Foundations of Software Engineering course project at Rochester Institute of Technology.

TECHNICAL STRENGTHS

Programming languages	C, C++, JAVA, Python, JavaScript, R, MATLAB, SQL
Frameworks	Flask, Spring, Angular
Software & Tools	LaTeX, Tableau, Version control system (Git), Microsoft Office, Blender 3D Computer Graphics Software, Adobe Photoshop

SCHOLARSHIPS

- DAAD Rise Professional Program 2024

EXTRA-CURRICULAR ACTIVITIES

- Runner-up in secondary school math olympiad, Udayan Higher Secondary School and College,
- Member of Udayan College Science Club, 2013-2015

LANGUAGE PROFICIENCY

Bangla	Fluent
English	Fluent
German	Beginner
